

Taiwan Eagle CCTV Secures 2010 Taipei International Flora Exposition.

The International Horticulture Exposition recognized by AIPH was first held in the late 20th century as a major event for every lover of nature and of gardening. The 2010 Taipei International Flora Exposition is held from Nov.6th, 2010 to Apr. 25th, 2011. The exhibition includes 4 major park areas, covering 91.8 hectares in total.

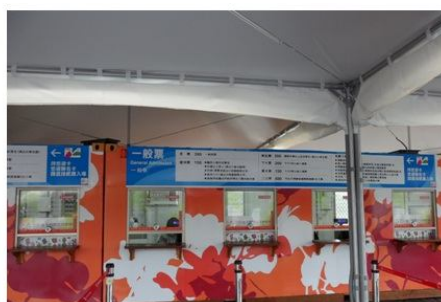

There are about 150pcs super WDR 650TVL cameras (model no. F95-650) were installed around the parks. It features high resolution video quality and superb WDR effect on the scene where the brightness standing out in the part of the scene.

Left: other's super WDR camera. The scene behind the window would fades out.

Right: Taiwan Eagle CCTV super WDR camera can shoot both the scene before the backlight (eg, the box and the shipping mark) and after the backlight (the red-brick building) clear.

These security cameras would protect the safety of the expected six million tourists during the whole exposition.
